

## CYBER SECURITY

Specialty Systems, Inc. (SSI) provides a full range of customized and affordable security services, products and solutions to help you identify, evaluate, and improve the overall security of your organization. Regardless of size, organizations face threats to the confidentiality, integrity and availability of information stored, distributed and exchanged by employees, suppliers, partners and customers.

SSI's Cyber Security service portfolio has been designed to deliver strategic, financial and technical benefits for the entire security operation of your organization through:

- > **Planning & Analysis:** SSI's highly-skilled experts take the proper steps to determine your organization's needs ensuring that the process is strategic, secure and on schedule by:
  - Performing preliminary gap analysis
  - Establishing a framework and safeguard requirements
  - Designing, a complete, customized, and secure network architecture
- > **Implementation & Testing:** SSI is able to offer real-time protection, thereby reducing the risks in today's ever-changing security threat environment through supporting:
  - Monitoring & management of security devices, network devices, servers, databases and applications using security event correlation software to ensure immediate response to threats in near real time as they are detected.
- > **Compliance & Governance:** SSI aligns your organization with the correct policies and procedures to meet NIST, ISO-27001 or other regulatory security controls, in addition to meeting your organization's specific governance needs. We specialize in:
  - Third Party Vulnerability Assessments, Audits and Review
  - Infrastructure and operations security
  - Internal policy, procedures, and standards development, implementation and monitoring
  - Compliance with FISMA and other regulatory mandates
  - Independent, multi-level security testing and assessment
  - Continuous monitoring and compliance
  - Security liaison services between provider and end users

### INDUSTRY-LEADING EXPERTISE AND SERVICE

SSI's ability to meet the information security needs across various industries, with commitment of quality delivery and our partnering approach has positioned us as a leader in the Cyber Security marketplace.

Our extensive experience and knowledge of industry security controls plays a key role in the development and implementation of Cyber Security and Risk Management Framework requirements.
