

# Asset Control and Tracking System ACTS

***Improving the accuracy and reducing the cost of managing your valuable corporate assets both within departments and across the enterprise***

- *Improves accuracy of inventory*
- *Reduced check-in/out processing*
- *Improves safety at work locations - reduces potential for foreign object damage*
- *Provides Management Decision Support Information – asset assignments, vendor quality history, asset warranty tracking, defect analysis*
- *Integrates with enterprise business applications*

Today, businesses and organizations own a vast array of valuable and important assets. The control and tracking of these assets has gotten more and more difficult and complex as the workforce becomes more mobile and work locations decentralize. Specialty Systems' Asset Control and Tracking System (ACTS) is designed to help you manage and track your important assets effectively and efficiently. ACTS incorporates the latest Bar Code and RF ID technologies to streamline such functions as inventory location counting and check-in/out processing.

With its web-based and mobile design, ACTS can be implemented into virtually any existing corporate Information Technology architecture. Possible application areas include control and tracking of:

- *IT Equipment*
- *Smartphones and Mobile Communications Devices*
- *Tools*
- *Weapons*
- *Evidence*
- *Medical and Office Equipment*
- *Vehicles*
