

# County Health Regulatory Inspection System CHRIS

## ***A mobile technology solution that automates and streamlines the inspection and compliance process for County Health Departments***

- *Improves inspection data accuracy through the use of NJAC standards-based check sheets*
- *Attach images and other files to inspection details for documenting violations*
- *Allows inspectors to view inspection history during new inspections and follow-ups*
- *Eliminates back office inspection data entry functions*
- *Feature-rich Inspection Management Reports*

Today, County Health Departments are facing immense pressures to maintain up-to-date public health related inspections and provide violation enforcement upon an ever-growing population of local businesses and community establishments for the protection of the general public. At the same time, County budgetary pressures restrict the ability to add to the inspector workforce. Moreover, the geographic coverage area for each inspector continues to increase through the ongoing commercial build-out within each County municipality.

Designed for the needs of a mobile inspection workforce, CHRIS allows Health Department inspectors to perform more inspections and complaint investigations in less time and with greater accuracy. CHRIS handles the following Health Department inspection types:

- *Food*
- *Recreational Bathing*
- *Animal Facilities*
- *Body Art*
- *Tanning*
- *Septic and Well*
- *Campgrounds & Youth Camps*
